Senior Web Developer

Extensive experience of 6 years in Web development Network/System administration, IT consultancy and Open Source software development.

-
- Developer of quality web software using popular web frameworks including **CakePHP**, **CodeIgniter**, **Django** and **Zope**
 - Adept of **DRY** and **KISS** and best code practices out there
 - Test driven development
 - Adept of Zen of Python applying it everywhere possible in my code
 - Team lead on a couple of custom in-house web projects
 - Open source supporter and developer
 - Not working without a distributed version control system like Git or Mercurial
 - Unix geek

Technical Skills

Web coding

- PHP with 6 years of experience
 - Frameworks: CakePHP, CodeIgniter
 - CMS: Wordpress, Drupal, Joomla
- Python with Django 2+ years of experience
- XML/XSLT/XUL/CSS3
- jQuery

System and network coding

- Python, Bash
- Komodo and Firefox extensions

Networking and system administration

- Linux (Debian/Gentoo distros mostly)
- Netfilter, knowledge of routing protocols(RIP/BGP/OSPF), traffic shaping
 - Administrator of LAMP servers including securing, database load balancing and setting up a CDN
 - Qmail + Courier, Postfix + Dovecot – but really I hate MTA administration
